1

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Sources: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and by State: 1999-2000" (electronic tables), December 12, 2002. Regarding the per capita amounts displayed above, these values have been generated with 1999 population estimates from U.S. Department of Commerce, Bureau of the Census, "Time Series of Intercensal State Population Estimates: April 1, 1990 to April 1, 2000" (electronic table), April 11, 2002.

1

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Sources: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and by State: 1999-2000" (electronic tables), December 12, 2002. Regarding the percentages displayed above, these values have been generated with 1999 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1998-2001" (electronic table), September 23, 2002.

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds failing within the proprietary control of a given state or locality. (With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slightly from 100% because of statistical rounding.]

Source: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and by State: 1999-2000" (electronic tables), December 12, 2002.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and by State: 1999-2000" (electronic tables), December 12, 2002. Regarding the per capita amounts displayed above, these values have been generated with 1999 population estimates from U.S. Department of Commerce, Bureau of the Census, "Time Series of Intercensal State Population Estimates: April 1, 1990 to April 1, 2000" (electronic table), April 11, 2002.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 4: Direct General Expenditures Per Capita for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 2000--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and by State: 1999-2000" (electronic tables), December 12, 2002. Regarding the per capita amounts displayed above, these values have been generated with 1999 population estimates from U.S. Department of Commerce, Bureau of the Census, "Time Series of Intercensal State Population Estimates: April 1, 1990 to April 1, 2000" (electronic table), April 11, 2002.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 5: Direct General Expenditures for Operating and Capital Functions as a Percentage of Personal Income by Outlay Dimension and Level of Government, FY 2000-A 50 State Profile/1

¹The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and by State: 1999-2000" (electronic tables), December 12, 2002. Regarding the percentages displayed above, these values have been generated with 1999 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1988-2001" (electronic table), September 23, 2002.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 5: Direct General Expenditures for Operating and Capital Functions as a Percentage of Personal Income by Outlay Dimension and Level of Government, FY 2000-A 50 State Profile/1

¹The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and by State: 1999-2000" (electronic tables), December 12, 2002. Regarding the percentages displayed above, these values have been generated with 1999 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1988-2001" (electronic table), September 23, 2002.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 6: Percentage Distribution of Direct General Expenditures for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 2000--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state and effect slightly from 100% because of statistical rounding.]

Source: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and by State: 1999-2000" (electronic tables), December 12, 2002.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

Table 6: Percentage Distribution of Direct General Expenditures for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 2000--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slightly from 100% because of statistical rounding.]

Source: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and by State: 1999-2000" (electronic tables), December 12, 2002.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.
